01

Introduction & Project Objectives

The screenshot displays the RECLAIM website's mood tracking interface. At the top, a dark blue navigation bar contains the logo and links for Home, Wellness, Support, Activities, Login, and Sign Up. The main header area is a solid blue block with the title 'Reclaim Your Wellness' and a subtitle: 'Track your mood, build healthy habits, and access support resources designed for university students.' Below this, a light green section titled 'How are you feeling today?' prompts users to 'Track your daily mood to understand your wellness patterns'. The mood selection area features five buttons with corresponding emojis: 'Great' (happy face), 'Good' (neutral), 'Okay' (neutral), 'Not Good' (sad), and 'Terrible' (very sad). An optional note field is provided below the mood buttons, with a 'Save Mood Entry' button at the bottom. A 'Recent Mood Entries' section is partially visible at the bottom, showing a message: 'Please [log in](#) to track your mood.'

Problem:

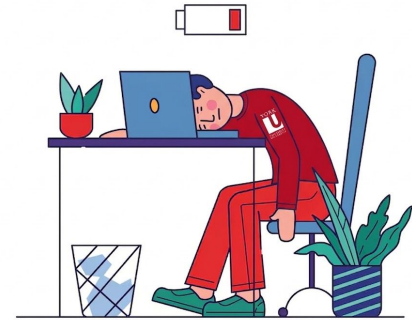

- Students struggle to balance school, work, and life
- Mental health is often neglected → burnout
- Lack of awareness of campus resources

Objective:

- Support student wellness through an app
- Mood tracking, habit building, journaling, games
- Integrate campus mental health resources

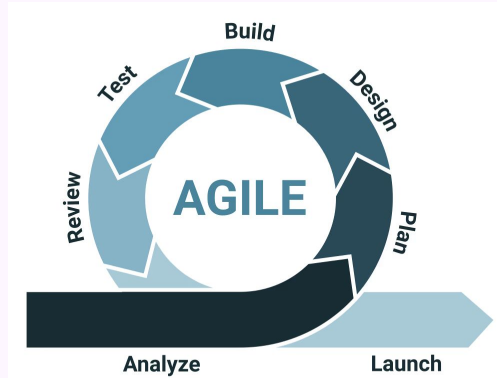

Target Audience:

- York University students!

02

Development Journey

OUR PROCESS AND DAY TO DAY WORKFLOW

Agile Workflow

- Iterative cycles: plan → build → test → improve
- User stories + prioritized backlog
- GitHub: branches, PRs, reviews
- Kanban board for task tracking

Quality & Feedback

- Continuous feedback from TA/instructor
- Testing + traceability
- Automated tests introduced later

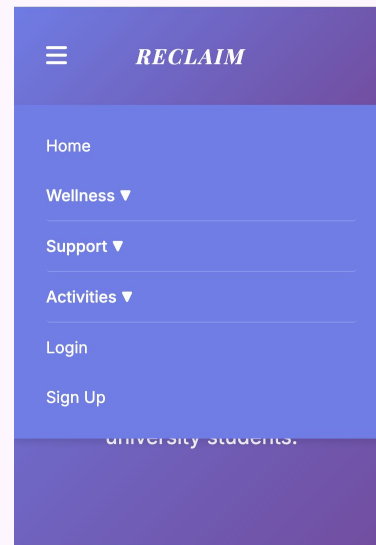

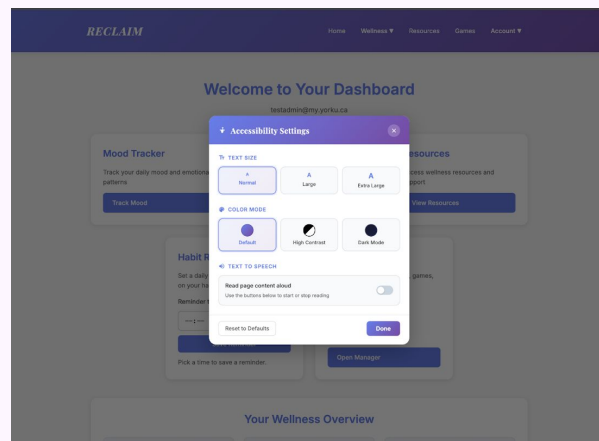

ITERATIONS & CHALLENGES

Key Milestones

- 1.1–1.2: Vision, requirements, backlog
- 2.1–2.2: Design, prototypes, testing plans
- 3.1–3.2: Final design, refactoring, 384 tests

Challenges

- Choosing desktop vs web direction
- Merge conflicts during collaboration
- Time constraints
- UI inconsistencies
- Refactoring for cleaner, consistent code

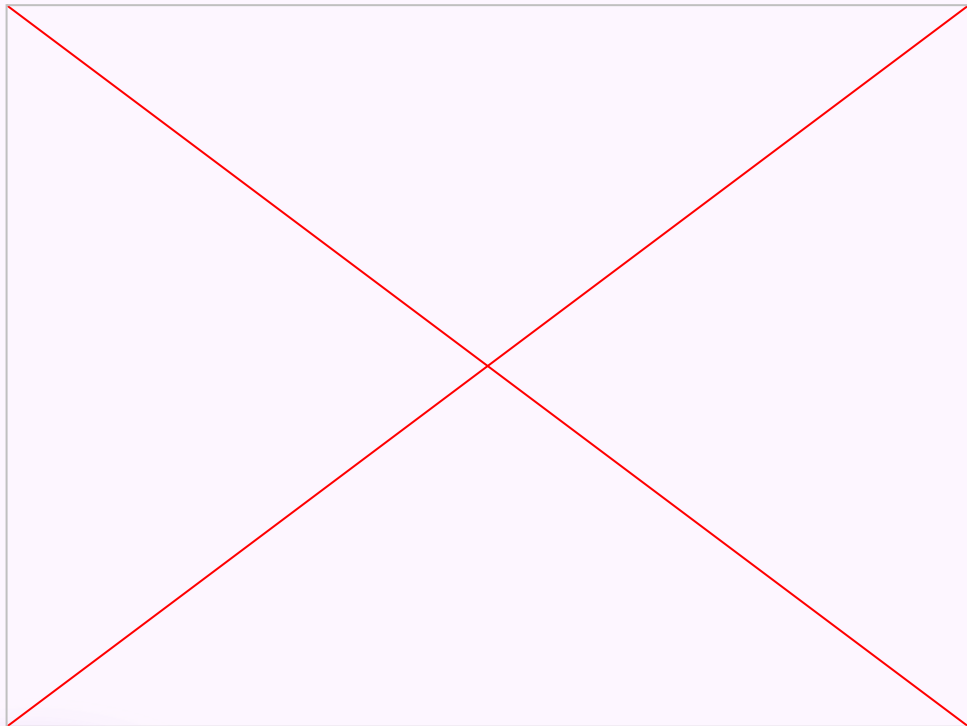

Testing Summary Overview

Summary

- 384 total tests
- 14 Test Suites
 - 7 Unit Tests
 - 7 Integration tests
- 9 Additional E2E Test suites

Frameworks:

- Jest (unit + integration)
- Playwright (E2E, Chromium & Firefox)
- Supertest (API)

Testing Summary Results

Summary:

- All 384 Tests Pass!
- No errors!

Coverage:

- 86.56% Branch coverage
- 83.04% Statement coverage
- 95.89% Function coverage
- 82.94% Of all lines covered

File	% Stmts	% Branch	% Funcs	% Lines
All files	83.04	86.56	95.89	82.94
Reclaim	82.56	84.58	92.5	82.38
server.js	82.56	84.58	92.5	82.38

Reclaim/utils/db	82.09	96.96	100	82.09
GameScores.js	76.92	100	100	76.92
Habits.js	80.32	100	100	80.32
JournalEntries.js	75.75	100	100	75.75
MoodEntries.js	75.75	100	100	75.75
Users.js	86.53	100	100	86.53
db.js	100	75	100	100
index.js	100	100	100	100
Test Suites: 14 passed, 14 total				
Tests: 384 passed, 384 total				
Snapshots: 0 total				
Time: 34.836 s, estimated 46 s				
Ran all test suites.				

03

Requirements + Design Overview

Requirement Breakdown

- Web-based wellness app for university students
- Helps manage mental health and daily routines
- Combines multiple tools in one platform:
 - Mood tracking
 - Journaling
 - Habit tracking
- Provides access to wellness tools and university resources
- Designed to be simple, fast, and easy to use

- **User authentication system:**
 - Sign up, login, logout
- **Mood tracking:**
 - Daily entries using emojis and notes
 - View previous mood history
- **Journaling system:**
 - Guided prompts or free writing
 - Save and view past entries
- **Habit tracking:**
 - Create habits and track completion
 - Streak tracking and progress updates
- **Additional features:**
 - Wellness tools (mindfulness exercises)
 - Resource page (YFS services)
 - Dashboard overview of activity

Key Functional Requirements

Nonfunctional Requirements

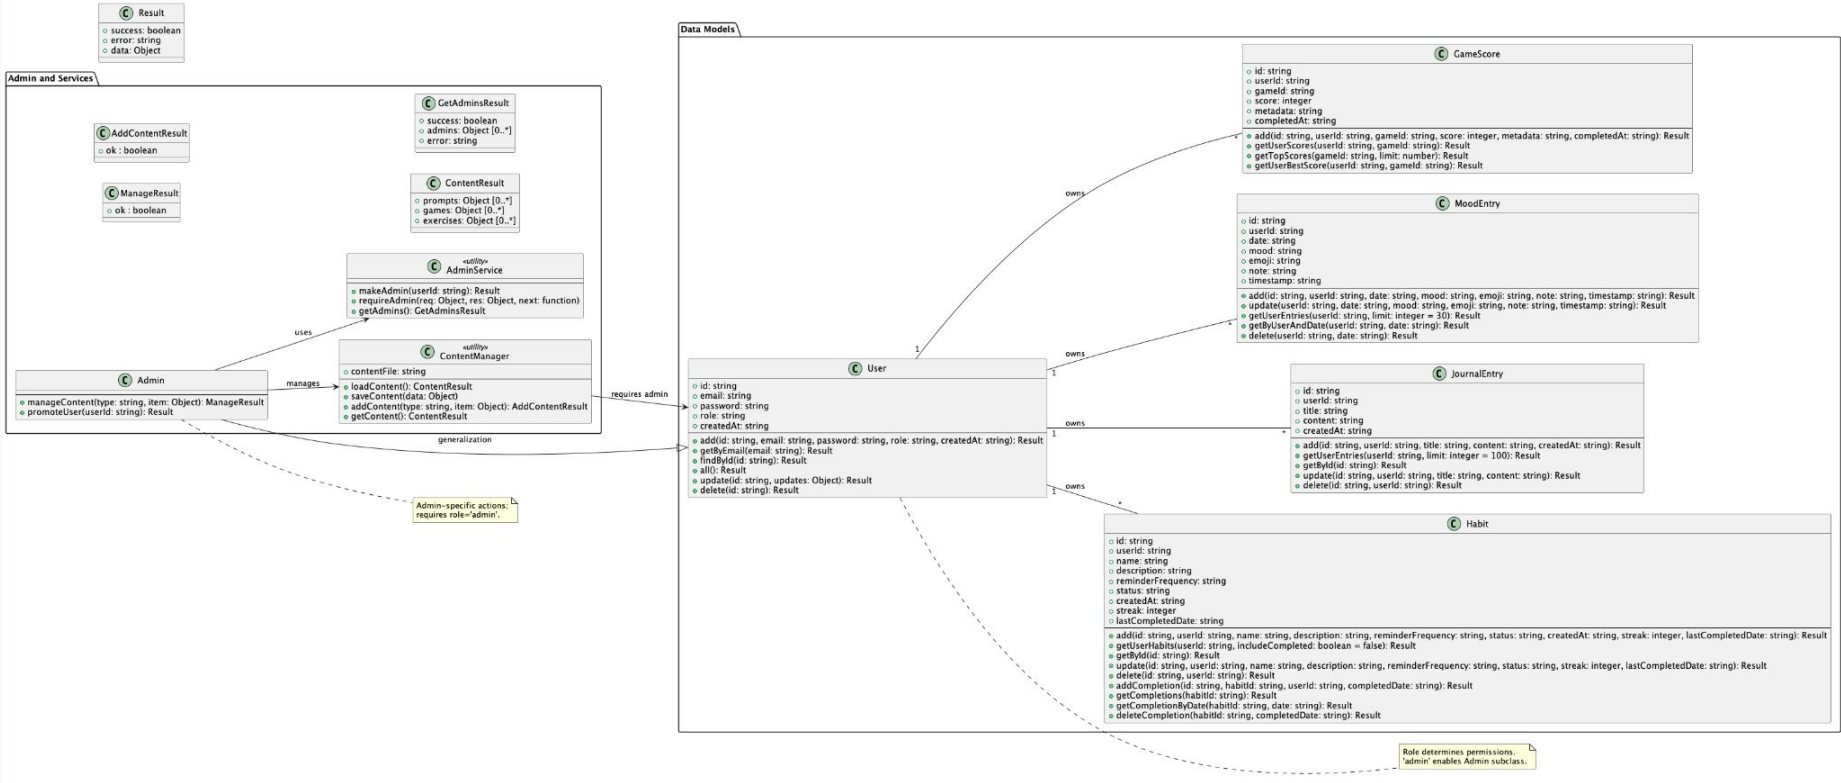

- **Usability:**
 - First-time users can complete a task quickly
- **Performance:**
 - Pages load within ~3 seconds
- **Responsiveness:**
 - Works on mobile, tablet, and desktop
- **Security & Privacy:**
 - User data is isolated and protected
- **Accessibility:**
 - Text-to-speech support
 - Adjustable text size
 - High contrast and dark mode

- **Full-stack web application:**
 - Frontend interface + backend logic
- **Role-based system:**
 - Student users
 - Admin users
- **Core data models:**
 - User
 - Mood Entry
 - Journal Entry
 - Habit
 - GameScore
- Features connected through database
- Dashboard aggregates user data into summaries

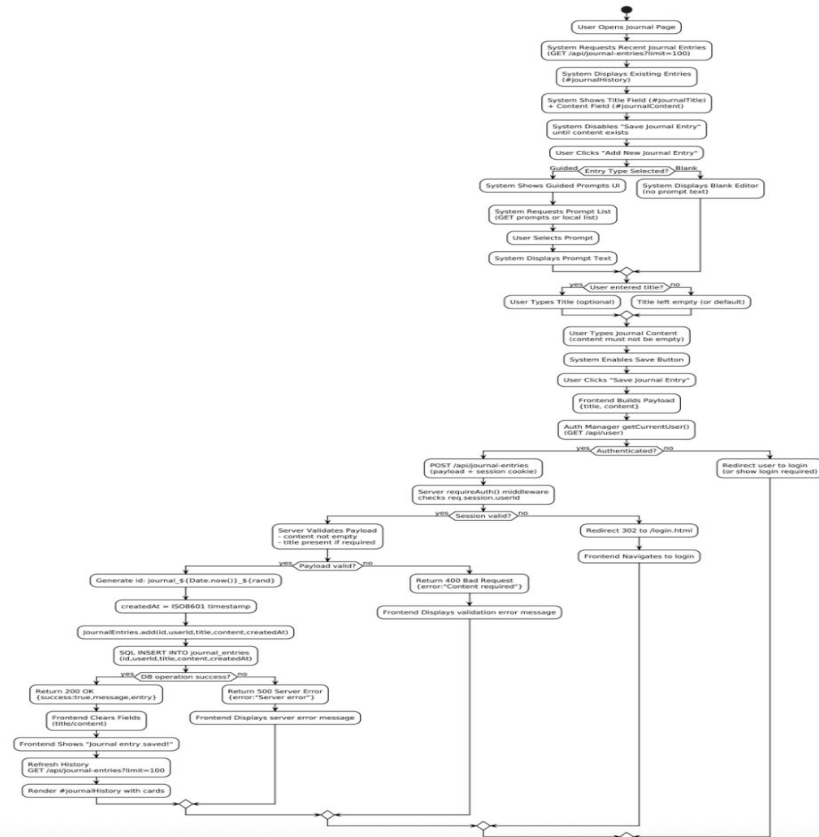

System Design Overview

Design Diagrams

- **Class diagrams:**
 - Show system structure and relationships
- **Sequence diagrams:**
 - Show how features work step-by-step
- **Activity diagrams:**
 - Show user workflows and decisions
- **Covers key flows:**
 - Authentication
 - Mood tracking
 - Journaling
 - Habit tracking

Live Demo!

Functional requirements

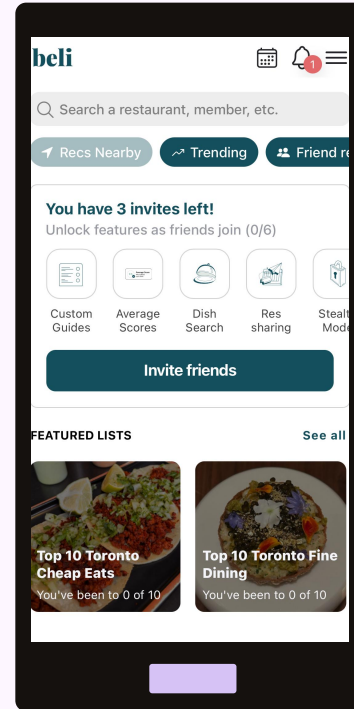

Future Enhancements

- Sharing progress with peers
 - Enables users to motivate each other to build healthy habits and goals
 - Incentives for users that share the app with friends
- Personalized recommendations
 - Recommend the user personalized goals, habits and activities based on their activity
- More insightful metrics and progress
 - Allow users to see a general overview of their progress

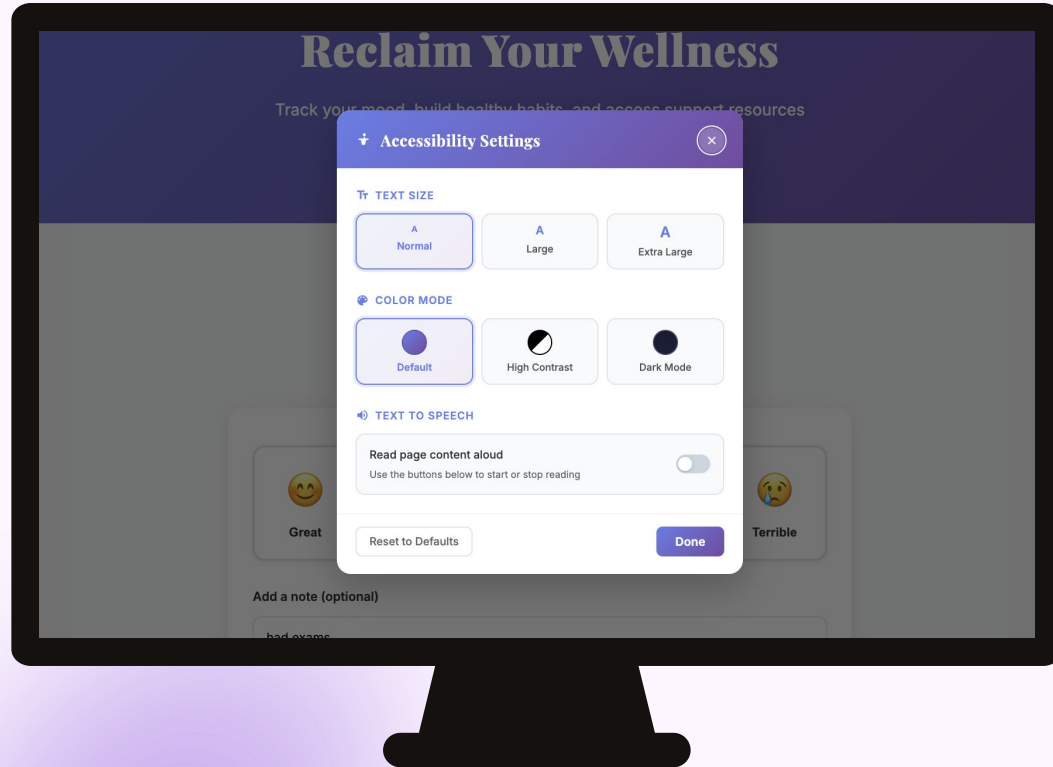

Inspiration for Peer Engagement

- Invite friends through a link
- Gain incentives and rewards for sharing the app with friends
